

Do not let the NAB lobbyists influence your decision on Satallite radio. I am using XM and my wife uses the other provider. There are no comercial stations that can provide the varity of music that I get through XM. Try to find a public station that provides the same music that you can get listening to BluesVille or Water Colors. The talk radio is less biased than those that are availible in my area as well. This is a service that I choose to pay for and one that I support not only with the subscription but through ownership of stock in both companies. Satallite radio is the same as Satallite TV, if one goes so does the other.
